Kevin Hu
DevOps Week 2

1. When any sort of change is made in the GitHub repo, we can easily send a slack notification to a group chat.
2. When a commit is made, we can have it logged in a Google sheet. This way, we can keep track of which files each person has been working on.
3. We can write our plans on Slack which updates a team Google Calendar to keep track of deadlines and expected times of delivery on small updates.
